

Statement of Circumstance

Frestine Dairy Australia (FDA) are looking to enter Milk Supply Agreements for an additional 100 million litres in the 2022/23 season. FDA will be seeking milk from the Gippsland and south-western Victoria dairy regions.

Milk supply in the northern Victoria dairy region will be considered where that milk can be used in Frestine commercial opportunities. Milk suppliers need to demonstrate a history of compliance quality standards as indicated in Schedule 3 – Specifications of the Frestine Milk Supply Agreement. Suppliers will need to provide safe and efficient tanker access for milk collection.
